

Child & Adolescent Grief Workshops

Children and adolescents meet in small confidential groups with peers who are also grieving the loss of a loved one. These workshop sessions encourage expression of feelings while educating participants about the normal grieving process. Each group is led by trained facilitators who provide opportunities to recognize and express feelings through the creation of a safe environment for self-disclosure. At least one parent/guardian per child is required to be on-site and participating in the concurrent adult session.

Saturday, June 14, 2008
